ELITE TEACHING EDITION - REVIEWED FOR WEBSITE USE

Contents

Unit 2 • Unit 2 • Chapter OL-T52 • 7 items • 20 marks

Chapter	Items	Marks	Starts
01. OL-T52 Transformations	7	20	4

June 2026 is intentionally deferred; November 2025 remains provisional QP-only in this private candidate.

Transformations

Unit 2 • 20 marks • 7 item(s)

June 2025 | 4MA1-2H Q2 | 2 marks

Positive integer scale factor

June 2025 | 4MA1-2H Q2 | 3 marks

Describe a rotation

November 2023 | 4MA1-2H Q3 | 2 marks

Reflection in a named mirror line

November 2023 | 4MA1-2H Q3 | 3 marks

Describe an enlargement

June 2023 | 4MA1-1H Q4 | 3 marks

Missing image coordinates under translation

June 2023 | 4MA1-1H Q4 | 5 marks

Describe an enlargement

January 2020 | 4MA1-1H Q8 | 2 marks

Positive fractional scale factor

Original question context and synchronized companion pages follow.

Terminal-demand ownership is preserved; prerequisite links remain in the internal ledger.

2

(a) On the grid, enlarge shape A with scale factor 3 and centre $(0, 1)$

(2)

Worked Solution 17

Enlargement from a centre

UNIT 2
2 marks**Apply the map**

$$(x, y) \mapsto (3x, 3y - 2) \text{ for scale factor 3 about } (0, 1).$$

Image vertices

$$(3, 1), (9, 1), (9, 10), (6, 10), (6, 4), (3, 4).$$

**Final answer**

The enlarged shape has vertices $(3, 1), (9, 1), (9, 10), (6, 10), (6, 4), (3, 4)$

(b) Describe fully the single transformation that maps triangle **P** onto triangle **Q**

(3)

Worked Solution 18

Rotation of a triangle

UNIT 2**3 marks****Identify the transformation** $P \rightarrow Q$ is a 180° rotation about $(5, 5)$.**Check one vertex**

$$(2, 2) \mapsto (2 \cdot 5 - 2, 2 \cdot 5 - 2) = (8, 8), \text{ matching } Q.$$

Final answerRotation 180° about $(5, 5)$

Question 23

4MA1-2H Q3 (a)

ORIGINAL QUESTION UNIT 2

2 marks

3

(a) Reflect shape **T** in the line $y = x$

(2)

Worked solution 23Reflection in $y = x$

MODULAR UNIT 2

2 marks

(a) – Reflection in $y = x$

Apply the reflection rule

Reflection in $y = x$ maps $(x, y) \mapsto (y, x)$.

Plot the image

The image vertices are $(4, 2), (4, 3), (5, 3), (5, 4), (6, 4), (6, 1), (5, 1), (5, 2)$; join them in order.**Final answer**Reflected shape with vertices $(4, 2), (4, 3), (5, 3), (5, 4), (6, 4), (6, 1), (5, 1), (5, 2)$

Completed diagram 23Reflection in $y = x$

MODULAR UNIT 2

2 marks

Completed solution diagram: Reflection in $y = x$ 

Question 24

4MA1-2H Q3 (b)

ORIGINAL QUESTION UNIT 2

3 marks

(b) Describe fully the single transformation that maps triangle A onto triangle B

(3)

Worked solution 24

Describe the enlargement

MODULAR UNIT 2

3 marks

(b) – Describe the enlargement

Compare corresponding lengths

Every side of B is three times the corresponding side of A, with the same orientation.

Locate the centre

The centre is $(7, 2)$; for example $(7, 3)$ maps to $(7, 5)$ with scale factor 3.

Final answer

Enlargement, scale factor 3, centre $(7, 2)$

Question 04

4MA1-1H Q4

ORIGINAL QUESTION**3 marks**

- 4 The diagram shows a sketch of triangle **A** and triangle **B** on a coordinate grid.

Diagram **NOT**
accurately drawn

- (a) Given that triangle **A** has been translated to give triangle **B**, work out the value of d , the value of e and the value of f

$d =$

$e =$

$f =$

(3)

Worked Solution 04

Translation coordinates

MODULAR UNIT 2

3 marks

Read the translation

$$(6, 12) - (-7, 2) = (13, 10).$$

Apply it to the other vertices

$$d = -5 + 10 = 5, \quad e = -3 + 10 = 7, \quad f = 9 - 13 = -4.$$

Final answer

$$d = 5, \quad e = 7, \quad f = -4$$

Question 05

4MA1-1H Q4

ORIGINAL QUESTION

5 marks

The diagram shows shape **P** and shape **Q** drawn on a grid.

(b) Describe fully the single transformation that maps shape **P** onto shape **Q**

(3)

(c) On the grid above, rotate shape **P** 90° clockwise about (3, 5)
Label your shape **R**

(2)

Worked Solution 05

Enlargement and rotation

MODULAR UNIT 2

5 marks

Describe P to QEnlargement, scale factor 3, centre $(0, 2)$.**Rotate P**

$$(x, y) \mapsto (3 + (y - 5), 5 - (x - 3)).$$

Plot the image

$$R : (0, 5), (1, 6), (3, 6), (1, 5).$$

Final answerEnlargement $(k = 3, C = (0, 2))$; $R : (0, 5), (1, 6), (3, 6), (1, 5)$

Completed diagram 05

Enlargement and rotation

MODULAR UNIT 2

5 marks

Completed solution diagram: Rotation image on the coordinate grid

8

On the grid, enlarge the shaded shape with scale factor $\frac{1}{2}$ and centre (1, 2)

Worked solution

January 2020 | Question 8 | 2 marks

Family: Construct an enlargement • Variant: Positive fractional scale factor

Method / working

1. Use $\text{centre} + \frac{1}{2}(\text{point} - \text{centre})$ for each vertex.
2. The image vertices are (4,6), (8,6), (8,3), (6,3).

Final answer: (4,6), (8,6), (8,3), (6,3)
